

# *Company Overview*

July 2008

# Mission

To deploy innovative EDA tools in the design community thus improving design teams productivity and assisting the growth of innovative EDA tool providers

# The Company

- Leading Edge was founded in 2005 by Pietro Vergine and Nigel Woolaway both of whom have extensive experience in the EDA arena
- Leading Edge is based in the Milan area enabling easy access to the major areas of electronic design in Europe

# Services for EDA Providers

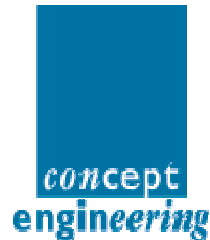

- Local representation for marketing, sales and technical support
- Development and delivery of training courses on your products
- Identification of potential users for your tools
- Local front-line technical support during tool evaluation
- Post-sales technical support in the same time zone as your customers

# Services for Design Teams

- Fast identification of innovative solutions for your design problem
- Qualification of tools for use in your design environment
- Integration of new tools into an established design flow
- Training on industry standard formats such as TCL and Liberty

# Our Partners

Leading Edge is a certified training centre for  
Mentor Graphics and Altera in Italy
